

Bulletin on Current Literature of the National Society for Crippled Children and Adults

A Monthly Bibliography for Workers with the Handicapped

Vol. 10, No. 3

One Dollar A Year

March 1949

ALPHA CHI OMEGA

123. MacMillan, Ellen Drake.

Cerebral palsy project. Lyre of Alpha Chi Omega. Jan., 1949. 52:2:70-74.

Resume of the Cerebral Palsy Day program at the November convention of the National Society for Crippled Children and Adults. Also reviews the Seattle Alumnae's work with the cerebral palsied and lists ACO scholarship awards for cerebral palsy study.

ALPHA GAMMA DELTA

124. Busfield, J. Mabel Clark.

Cerebral palsy-aid fellowships will provide training at famous Bellevue Hospital. Alpha Gamma Delta Quarterly. Jan., 1949. 40:1:16-20.

A report of Alpha Gamma Delta's altruistic work projects and announcements of speech scholarship at Northwestern University and cerebral palsy fellowship at the Rehabilitation Clinic at Bellevue Hospital.

AMERICAN ASSOCIATION OF SCHOOL ADMINISTRATORS--DIRECTORIES

See 192.

APHASIA

125. Halstead, Ward C.

The Halstead-Wepman aphasia screening test, by Ward C. Halstead and Joseph M. Wepman. J. of Speech and Hearing Disorders. Mar., 1949. 14:1:9-15.

"The purpose of the present article is to describe a screening test for aphasia which has found rather wide application in connection with aphasic patients from World War II, but which previously has not been formally announced."

AUSTRALIA. SOUTH AUSTRALIA. CRIPPLED CHILDREN'S ASSOCIATION OF SOUTH AUSTRALIA, ADELAIDE--REPORTS

126. Australia. South Australia. Crippled Children's Association of South Australia, Adelaide.

Ninth annual report and financial statements for period 1st May, 1947 to 30th April, 1948. Adelaide, South Australia, The Assn., 1948. 24 p., illus.

BIRTH

127. Roberts, M. Hines.

Emergencies encountered in the neonatal period. J. Am. Med. Assn. Feb. 12, 1949. 139:7:439-444.

Issued by the Research and Legislative Service, National Society for Crippled Children and Adults, Inc.

11 South LaSalle Street

Chicago 3, Illinois

BIRTH (continued)

A discussion of the pathological conditions accounting for the major number of deaths among the newborn. Anoxia, intracranial injury, congenital anomalies, and blood loss are among subjects treated.

BLIND--EMPLOYMENT--WEST VIRGINIA

128. Stalnaker, Wade O.

Romney Diagnostic Adjustment Center for Adult Blind. J. of Rehabilitation. Feb., 1949. 15:1:20-24.

Description of a special diagnostic adjustment center for the blind held for the purpose of determining the capacities of the blind for job placement. The program included psychological testing, vocational diagnosis and planning, simulated industrial assembly, and social and recreational activities.

BLIND--SPECIAL EDUCATION

129. Hughes, Bernice.

Materials and equipment for the partially seeing child. J. of Exceptional Children. Feb., 1949. 15:5:139-143, 160.

The education of the blind and partially seeing child differs not in method of instruction, but primarily in need of special materials, equipment, furniture, etc. Author discusses types of supplies and apparatus used in the Oregon program of special education.

CAMPING--PERSONNEL

130. Scott, Ruth Boyer.

Are you interested in camp nursing? Trained Nurse and Hospital Rev. Feb., 1949. 122:2:68-69, 82.

Pertinent information for the nurse who is interested in camp nursing. Qualifications, salary, types of camps, clothing, materials, supplies, and programs are discussed.

CANCER

131. Cancer among children. Statistical Bul. Jan., 1949. 30:1:5-8.

Decline in children's mortality from infectious diseases has emphasized the problem of death from cancer among children, which is now the 2nd ranking cause of death among children from 1-12.

CANCER--ETIOLOGY

131. U. S. Public Health Service.

Environmental and occupational cancer, by W. C. Hueper. (Washington, U. S. Govt. Print. Off., 1948). 69 p. (Supplement No. 209 to Public Health Reports).

"This study presents a comprehensive review of current knowledge of the environmental causes of human cancer. The conclusion is inescapable that exogenous agents, particularly of industrial origin, are important factors in the causation of certain types of cancer."

CEREBRAL PALSY--PARENT EDUCATION

133. Great Britain. British Council for the Welfare of Spastics, London.

Notes for parents on the home care of children handicapped by cerebral palsy. (London) The Council, 1949. 23 p.

A special section titled "Illustrations of special equipment" has been stapled to the text.

A manual containing specific instruction on the care of both the spastic and athetoid child. Feeding, exercise, speech and muscle development are discussed from the standpoint of proper treatment.

CEREBRAL PALSY--PERSONNEL

See 124.

CEREBRAL PALSY--PROGRAMS

See 123.

CEREBRAL PALSY--SPEECH CORRECTION--RECORDS

134. Delaware. State Board of Health, Dover.

Clinical forms for cerebral palsy speech and hearing clinic, by Marion L. Gilmore. (Dover, The Board, 1948?). (30) p. Mimeo.

Bibliography: pp. 3-4.

CLEFT PALATE

135. Dalrymple, Laurie H.

Our child had a cleft palate. Hygeia. Mar., 1949. 27:3:186-187, 199-200.

A parent's account of the medical and nursing care necessary for their daughter. The amazing results achieved through surgery and speech training secured through normal association with older children are described.

CLEFT PALATE--SPEECH CORRECTION

136. Buck, McKenzie.

Organized speech therapy for cleft palate rehabilitation, by McKenzie Buck and Robert Harrington. J. of Speech and Hearing Disorders. Mar., 1949. 14: 1:43-52.

Discusses series of lip exercises, tongue exercises, back-of-tongue and soft palate exercises. Purpose and instruction for exercises are given so that a proper understanding will accompany and facilitate therapy.

CONGENITAL DEFECTS--ETIOLOGY

137. American Academy of Pediatrics. Committee for the Study of Congenital Malformations.

Study of the relation of congenital malformations to maternal rubella and other infections, by Herbert C. Miller (and others). Pediatrics. Feb., 1949. 3:2:259-270.

"The data on 199 cases of maternal rubella have been presented according to the method by which the maternal infection was diagnosed and according to the period of gestation in which it occurred. This study was supported by a grant from the National Society for the Prevention of Blindness."

DEAF--EQUIPMENT

138. Hedgecock, Leslie D.

When your client needs a hearing aid, by Leslie D. Hedgecock and Waring J. Fitch. J. of Rehabilitation. Feb., 1949. 15:1:25-29.

A constructive discussion on the methods of solving problems encountered by the hard of hearing in securing a proper hearing aid. Stresses fact that a good hearing aid is a means of social, economic and emotional security.

DEAF--PROGRAMS

139. Lierle, Dean M.

The role of the otolaryngologist with the hard of hearing child. J. of Exceptional Children. Feb., 1949. 15:5:130-133, 154.

The interest and work of an otolaryngologist should not be confined to his own field of surgical or medical treatment, but should encompass also the fields of prevention and public education.

DEAF--SPECIAL EDUCATION

140. Sprunt, Julie W.

Auditory deficiency and academic achievement, by Julie W. Sprunt and Frank W. Finger. J. of Speech and Hearing Disorders. Mar., 1949. 14:1:26-32.

Report of a study made of 692 school children between the grades of 3-7 in five elementary schools of Louisa County, Virginia, to determine the relationship between hearing disability and scholastic progress. Non-verbal test results seem to indicate that the hard of hearing child will progress more slowly than the normal hearing child.

EMPLOYMENT

See 170.

ENCEPHALITIS

141. Appelbaum, Emanuel, and others.

Measles encephalitis, by Emanuel Appelbaum, Vera B. Dolgopol and Joseph Dolgin. Am. J. of Diseases of Children. Jan., 1949. 77:1:25-48.

Study made of 74 patients with measles encephalitis at the Willard Parker Hospital in New York between the years 1936 - 1946. Six autopsy studies and 33 follow-up studies are given.

HANDICAPPED--PROGRAMS

142. Koenig, Frances G.

Social consciousness in relation to the physically handicapped. J. of Exceptional Children. Feb., 1949. 15:5:144-147, 160.

A discussion of historic and present day attitudes toward the crippled with comments on the social significance of such patterns. The development of social consciousness in our modern society indicates that at last the disabled can look forward to the opportunity of living a life that is not markedly different or inferior to his normal brother.

HANDICAPPED--PROGRAMS--INDIANA

143. Indiana. Indiana Society for Crippled Children.

A directory of services for the physically handicapped in the state of Indiana. Indianapolis, Ind., The Society (1949). 27 p.

Bibliography: pp. 23-27.

Published for distribution by the Indiana Society for Crippled Children, 527 Lemcke Bldg., Indianapolis, Ind. Free.

HEALTH EDUCATION

144. (American Association for Health, Physical Education and Recreation)

Voluntary health agencies and the schools. J. of the Amer. Assn. for Health, Physical Education and Recreation. Feb., 1949. 20:2:73-76.

Contents: 1. A statement on the relationship of voluntary health agencies to the school health program. 2. Supplementary teaching material offered for school use. 3. Sponsored audio-visual material offered for school use.

"These reports are policy statements intended for use primarily with voluntary health agencies. They were prepared for the purpose of clarifying philosophy, relationships and procedures for the reciprocal contacts between schools and voluntary health agencies."

HEALTH SERVICES--GT. BRITAIN

145. Davis, Burnet M.

The British National Health Service. Public Health Reports. Feb. 11, 1949. 64:6:161-191.

A non-critical account of the British National Health Service, based upon the Act itself and the regulations and directives arising from the Bill. Reviews scope and background of program, administration, and professions and institutions.

HEART DISEASE

146. Modern Medicine. Symposium on heart disease. Feb. 15, 1949. 17:4:53-96.
Title of issue: Symposium on heart disease.

Contents: Foreword, by Tinsley Harrison.-Acute rheumatic heart disease in children, by Leo M. Taran.-Subacute bacterial endocarditis, by Leo Loewe.-Treatment of circulatory insufficiency, by George R. Herrmann.-Management of coronary artery disease, by Howard B. Sprague.-Pathogenesis and treatment of hypertension, by Arthur Grollman.-Roentgen diagnosis of heart disease, by Merrill C. Sosman.-Recent progress in electrocardiography, by Clayton J. Lundy.-Right heart catheterization in congenital heart disease, by Lewis Dexter.

HOSPITAL SCHOOLS

147. Greenberg, Harold A.

The emotional problems and education of hospitalized children. J. of Pediatrics. Feb., 1949. 34:2:213-218.

The convalescent and hospitalized child requires education as a part of his normal development. His proper adjustment to hospitalization and new groups (staff, children, etc.) will further child's chances for emotional and educational growth. The teacher has the responsibility of providing education with methods and techniques largely original, since the field is still new and concrete programs are as yet undeveloped.

See also 187.

LARYNGECTOMY

148. Martin, Hayes.

Nursing care following laryngectomy, by Hayes Martin and Harry E. Ehrlich. Am. J. of Nursing. Mar., 1949. 49:3:149-152.

In same issue: Greene, James S. Speech rehabilitation following laryngectomy. pp. 153-154.

LIGHTING

149. Saale, C. W.

New trends in school lighting. School and Society. Feb. 19, 1949. 69: 1783:121-123.

"The numerous changes in school lighting which have developed have revolutionized school-plant planning. This article will call attention to some of the recent trends in this area."

MENTAL DEFECTIVES

See 152.

MENTAL DEFECTIVES--PSYCHOLOGICAL TESTS

150. Doll, Edgar A.

Research on mental deficiency. Training School Bul. Feb., 1949. 45:10: 171-180.

"... an overall statement of the philosophy and program of the Vineland Laboratory as presently conceived, with diagrammatic outline of the framework within which the program operates and toward which it is oriented."

MUSCULAR DYSTROPHY

151. Scott, Michael.

A case of amyotonia congenita associated with occlusion of the sagittal sinus and bilateral subdural hygroma. J. of Pediatrics. Feb., 1949. 34:2:181-194.

MUSIC

152. Nameny, Grace Westberg.

Inaugurating a music education program for mentally retarded. J. of Exceptional Children. Feb., 1949. 15:5:134-138, 160.

Primary purpose of course was to achieve expression on part of each child. Method of procedure included group and individual work, creative work, and development of sense of musical appreciation.

NATIONAL FOUNDATION FOR INFANTILE PARALYSIS

153. Polio; a story of conflicting personalities, promotion methods and treatment for crippling disease. Consumer Reports. Feb., 1949. (4) p. Reprint. In same issue: The Kenny treatment.

An impartial account of the competitive and overlapping work of the National Foundation for Infantile Paralysis and the Sister Elizabeth Kenny Foundation. Suggests that such duplication of effort might be eliminated if the government assumed greater responsibility by adopting a national health program.

NURSERY SCHOOLS

154. New York. State Charities Aid Association. New York Committee on Mental Hygiene. The child's first days in nursery school; a pamphlet for nursery staff. (New York, The Assn., c1948) 14 p.

A description of a child's direct and indirect reactions to his first day at nursery school. Suggestions are offered on what to do and what to avoid in putting the child at ease and establishing a pleasant impression.

155. ----.

How a child feels about entering a nursery center; a pamphlet for parents. (New York, The Assn., c1948) 9 p. 15¢

The purpose of this pamphlet is to describe the child's emotional reactions toward his new surroundings and offers suggestions to parents on preparing and helping the child make a happy and wholesome adjustment to his new life.

156. ----.

What nursery school is like; a pamphlet for parents. (New York, The Assn., c1948). 10 p. 15¢

A typical nursery school or child center is described and important features for parents are pointed out. Staff, equipment, schedule, and parent-teacher relations are considered.

See also 191.

NURSING PERSONNEL

See 172.

NUTRITION

157. Pennsylvania. Woods Schools. Child Research Clinics. Langhorne.

Nutrition in relation to child development and behavior. Langhorne, Pa., The Schools, 1948. 36 p. (Proceedings of the Spring Conference, May, 1948).

Contents: Foods, nutrition and world organization, by Frank A. Calderone.- Certain nutritional problems as related to child behavior in France, by Alice Doumic.-Nutritional aspects of modern psychiatric problems, by Paul Dozier.- Dietetic factors in pre-natal development, by Josef Warkany.-Education in Nutrition, by Frederick J. Stare.-Nutrition and mental hygiene, by Paul Gyorgy.

OLD AGE--INSTITUTIONS

158. New York. Welfare Council of New York City.

Suggested standards for homes for the aged, prepared by Conference Group on Welfare for the Aged; 6th ed. New York, The Council, cl948. (33) p.

Bibliography: pp. 32-33.

A discussion of location, planning, furnishings, personnel, recreation, medical care and all problems pertinent to the organization and administration of a well-planned home for the aged.

OLD AGE--MEDICAL TREATMENT

159. Dinken, Harold.

Physical medicine in disabilities of the aged. Archives of Physical Medicine. Feb., 1949. 30:2:78-81.

A brief statement on the aged, the physiologic aspects associated with aging, and a few general observations on the medical care of certain disability groups.

OLD AGE--SOCIAL SERVICE

160. Field, Minna.

Medical social work for the aged. Bul., Am. Assn. Med. Social Workers. Feb., 1949. 22:1:4-10.

In same issue: Levine, Harry A. Recreation and services for the aged. p.11-16.

"These two papers presenting the problems of aging population from a social point of view were given at the National Conference of Social Work, April, 1948."

PARALYSIS AGITANS--MEDICAL TREATMENT

161. Ryan, G. M. S.

Benadryl in the treatment of Parkinsonism, by G. M. S. Ryan and J. Spurway Wood. Lancet. Feb. 12, 1949. 256:6546:258-259.

A resume of results in 40 cases indicates the drug is beneficial, simple to use and does not require laboratory control.

162. Schwab, Robert S.

Parpanit in the treatment of Parkinson's disease, by Robert S. Schwab and Denis Leigh. J. Am. Med. Assn. Mar. 5, 1949. 139:10:629-634.

Clinical report of the use of parpanit in 50 patients during the past year at Massachusetts General Hospital in Boston. Conclusions indicate that with individualized regulation and supervision, satisfactory results will follow the use of the drug.

PARAPLEGIA

163. Muir, Lola L.

The paraplegia. Am. J. of Occupational Therapy. Jan.-Feb., 1949. 3:1:12-19.

A comprehensive discussion covering treatment, dietetics, physical medicine, physical therapy and occupational therapy.

PHYSICAL EXAMINATIONS

164. Manning, J. V.

Physical disability in industrial recruits. Brit. J. of Physical Medicine. Jan.-Feb., 1949. 12:1:2-6.

Specific causes of disabilities such as poor vision, poor physique, rheumatism, varicose veins, deformities, etc., are discussed in relation to degree of employment disability associated with each. Study proves that medical examinations at pre-employment stage is advisable, specially in the over 40-age bracket.

PLAY

165. Alessandrini, Norma A.

Play - a child's world. Am. J. of Occupational Therapy. Jan.-Feb., 1949. 3:1:9-12.

PLAY (continued)

Play is an integral part of the development of a child. Its importance and place in his daily activities should not be minimized or hampered.

166. Davidson, E. Rita.

Play for the hospitalized child. Am. J. of Nursing. Mar., 1949. 49:3:138-141.

In same issue: Basile, Josephine V. A play therapy cart. p. 142.

The need for a planned hospital play program, the essentials of such a program, and the types of toys useful are discussed by a Teaching Fellow in pediatric nursing.

POLIOMYELITIS--ASSOCIATIONS

See 153.

POLIOMYELITIS--OCCUPATIONAL THERAPY

167. MacLean, Florence M.

Occupational therapy in the management of poliomyelitis. Am. J. of Occupational Therapy. Jan.-Feb., 1949. 3:1:20-27.

A program for the four stages (early acute, subacute, convalescent, and chronic) of occupational therapy treatment of poliomyelitis is presented. Includes illustrations of progress charts used at the University of Illinois Hospitals.

POLIOMYELITIS--RESEARCH

168. National Foundation for Infantile Paralysis.

The research story of infantile paralysis, by Harry M. Weaver. New York, The Foundation, (1949). 28 p., illus. (Publication No. 42).

A summary of the objectives of the National Foundation for Infantile Paralysis research program and a commentary on progress made thus far in the field.

POSTURE

169. Fitzhugh, Mabel L.

Posture insurance for infants and children. Public Health Nursing. Feb., 1949. 41:2:70-77.

"Article concerned with certain techniques of handling infants and young children which have been found useful in developing strong, straight bodies and in preventing common postural and structural defects such as round shoulders, hollow chests, pot bellies, bow legs, knock knees, pigeon toes, and pronated feet."

PRESIDENT'S COMMITTEE ON NATIONAL EMPLOY THE PHYSICALLY HANDICAPPED WEEK.

170. McCahill, William P.

The president's committee reports on "NEPH" week. Employment Security Rev. Feb., 1949. 16:2:20-22.

Reports include review of the Tennessee formula, the Saginaw program and a statement by the Director on the number of placements made by local unemployment services.

REHABILITATION

171. Boyle, Robert W.

A physical medicine rehabilitation hospital. Archives of Physical Medicine. Feb., 1949. 30:2:82-86.

A short discussion of rehabilitation and considerations necessary in establishing a sound rehabilitation program, which would meet the emotional and physical needs of its patients.

REHABILITATION (continued)

172. Felder, Rose.

The handicapped nurse; a true story with a happy ending. Am. J. of Nursing. Mar., 1949. 49:3:155.

An autobiographical account of a nurse's accident which left her physically handicapped, her rehabilitation at the center sponsored by the Connecticut Society for Crippled Children & Adults, and her ultimate return to nursing.

REHABILITATION CENTERS--DELAWARE

173. Delaware. Delaware Curative Workshop, Wilmington.

Treating the physically injured in Wilmington and vicinity. (Wilmington, The Workshop, 1949) (6) p., illus.

A resume of the history and work of the workshop, its problem of a new location and preliminary plans for a proposed new building to house the shop.

Rh FACTOR

174. Allott, E. N.

The rhesus factor; a summary based on 200 cases by E. N. Allott and C. A. Holman. Lancet. Feb. 6, 1949. 256:6545:209-214.

"The summary is based on nearly 200 cases in which anti-Rh antibodies were found. These occurred in many hospitals and were investigated at the Group Laboratory (Lewisham Hospital, England) from 1942 to the end of 1946."

RHEUMATIC FEVER--DIAGNOSIS

175. Brainerd, Henry D.

The differential diagnosis of rheumatic fever and infections of the central nervous system, by Henry D. Brainerd and Maurice Sokolow. J. of Pediatrics. Feb., 1949. 34:2:204-212.

"It is the purpose of this paper to record several instances wherein rheumatic fever was considered to be poliomyelitis or meningitis, and to report two cases where meningococcus infections were misdiagnosed as rheumatic fever."

RHEUMATIC FEVER--PROGRAMS--NEW JERSEY

176. Carleton, Sara H.

Federal grant helps set up rheumatic fever clinic. Trained Nurse and Hospital Rev. Feb., 1949. 122:2:66-67, 92.

A description of the "total care" program of St. Michael's Hospital, Newark, N. J., which consists of emotional, social and educational care as well as medical treatment. The clinic is sponsored by the State Department of Health and a \$50,000 grant from the federal government.

SCHOOL BUILDINGS

See 192.

SCHOOL HYGIENE

177. National Tuberculosis Association.

Children with special health problems; educational adaptations in school, home and hospital. (New York) The Assn., c1948. (24) p.

Bibliography: p. 24.

Report of the Committee on Educational Adaptations for Children with Special Health Problems.

"Attention here will be concentrated on the problems of children suffering from tuberculosis, malnutrition, rheumatic fever and other cardiac disabilities, diabetes, allergy, epilepsy, as well as those convalescent following illness or operation."

Replaces an earlier pamphlet entitled "The physically below-par child" issued in 1940.

PLAY (continued)

Play is an integral part of the development of a child. Its importance and place in his daily activities should not be minimized or hampered.

166. Davidson, E. Rita.

Play for the hospitalized child. Am. J. of Nursing. Mar., 1949. 49:3:138-141.

In same issue: Basile, Josephine V. A play therapy cart. p. 142.

The need for a planned hospital play program, the essentials of such a program, and the types of toys useful are discussed by a Teaching Fellow in pediatric nursing.

POLIOMYELITIS--ASSOCIATIONS

See 153.

POLIOMYELITIS--OCCUPATIONAL THERAPY

167. MacLean, Florence M.

Occupational therapy in the management of poliomyelitis. Am. J. of Occupational Therapy. Jan.-Feb., 1949. 3:1:20-27.

A program for the four stages (early acute, subacute, convalescent, and chronic) of occupational therapy treatment of poliomyelitis is presented. Includes illustrations of progress charts used at the University of Illinois Hospitals.

POLIOMYELITIS--RESEARCH

168. National Foundation for Infantile Paralysis.

The research story of infantile paralysis, by Harry M. Weaver. New York, The Foundation, (1949). 28 p., illus. (Publication No. 42).

A summary of the objectives of the National Foundation for Infantile Paralysis research program and a commentary on progress made thus far in the field.

POSTURE

169. Fitzhugh, Mabel L.

Posture insurance for infants and children. Public Health Nursing. Feb., 1949. 41:2:70-77.

"Article concerned with certain techniques of handling infants and young children which have been found useful in developing strong, straight bodies and in preventing common postural and structural defects such as round shoulders, hollow chests, pot bellies, bow legs, knock knees, pigeon toes, and pronated feet."

PRESIDENT'S COMMITTEE ON NATIONAL EMPLOY THE PHYSICALLY HANDICAPPED WEEK.

170. McCahill, William P.

The president's committee reports on "NEPH" week. Employment Security Rev. Feb., 1949. 16:2:20-22.

Reports include review of the Tennessee formula, the Saginaw program and a statement by the Director on the number of placements made by local unemployment services.

REHABILITATION

171. Boyle, Robert W.

A physical medicine rehabilitation hospital. Archives of Physical Medicine. Feb., 1949. 30:2:82-86.

A short discussion of rehabilitation and considerations necessary in establishing a sound rehabilitation program, which would meet the emotional and physical needs of its patients.

REHABILITATION (continued)

172. Felder, Rose.

The handicapped nurse; a true story with a happy ending. Am. J. of Nursing. Mar., 1949. 49:3:155.

An autobiographical account of a nurse's accident which left her physically handicapped, her rehabilitation at the center sponsored by the Connecticut Society for Crippled Children & Adults, and her ultimate return to nursing.

REHABILITATION CENTERS--DELAWARE

173. Delaware. Delaware Curative Workshop, Wilmington.

Treating the physically injured in Wilmington and vicinity. (Wilmington, The Workshop, 1949) (6) p., illus.

A resume of the history and work of the workshop, its problem of a new location and preliminary plans for a proposed new building to house the shop.

Rh FACTOR

174. Allott, E. N.

The rhesus factor; a summary based on 200 cases by E. N. Allott and C. A. Holman. Lancet. Feb. 6, 1949. 256:6545:209-214.

"The summary is based on nearly 200 cases in which anti-Rh antibodies were found. These occurred in many hospitals and were investigated at the Group Laboratory (Lewisham Hospital, England) from 1942 to the end of 1946."

RHEUMATIC FEVER--DIAGNOSIS

175. Brainerd, Henry D.

The differential diagnosis of rheumatic fever and infections of the central nervous system, by Henry D. Brainerd and Maurice Sokolow. J. of Pediatrics. Feb., 1949. 34:2:204-212.

"It is the purpose of this paper to record several instances wherein rheumatic fever was considered to be poliomyelitis or meningitis, and to report two cases where meningococcus infections were misdiagnosed as rheumatic fever."

RHEUMATIC FEVER--PROGRAMS--NEW JERSEY

176. Carleton, Sara H.

Federal grant helps set up rheumatic fever clinic. Trained Nurse and Hospital Rev. Feb., 1949. 122:2:66-67, 92.

A description of the "total care" program of St. Michael's Hospital, Newark, N. J., which consists of emotional, social and educational care as well as medical treatment. The clinic is sponsored by the State Department of Health and a \$50,000 grant from the federal government.

SCHOOL BUILDINGS

SCHOOL HYGIENE

177. National Tuberculosis Association.

Children with special health problems; educational adaptations in school, home and hospital. (New York) The Assn., c1948. (24) p.

Bibliography: p. 24.

Report of the Committee on Educational Adaptations for Children with Special Health Problems.

"Attention here will be concentrated on the problems of children suffering from tuberculosis, malnutrition, rheumatic fever and other cardiac disabilities, diabetes, allergy, epilepsy, as well as those convalescent following illness or operation."

Replaces an earlier pamphlet entitled "The physically below-par child" issued in 1940.

SISTER ELIZABETH KENNY FOUNDATION
See 153.

SOCIAL SECURITY ACT

178. U. S. Social Security Administration.

Compilation of the Social Security Laws, including the Social Security Act, as amended and related enactments through July 1, 1948. Washington, The Administration, 1948. 114 p.

"This material has been compiled ... solely for convenient reference purposes."

SPECIAL EDUCATION--INDIANA

179. Hoosier News; Indiana Society for Crippled Children. Feb., 1949.

Title of issue: Special education issue.

Partial contents: Special education in action, by Dale V. Swanson.-Editorial, by Jeanette Riker. Services for handicapped persons at Indiana University, by Robert Milisen.-Special education at Ball State Teachers College, Muncie, by Allan W. Huckleberry.-Special education at Indiana State Teachers College, by Rutherford B. Porter.-Special education-Purdue University, by M. D. Steer.-Pioneering in pre-school programs, by V. Jones.

SPEECH CORRECTION

See 148, 193.

SPEECH CORRECTION--GREAT BRITAIN

180. Wilkins, Joyce L.

For the physiotherapist; the scope and aims of speech therapy. Brit. J. of Physical Medicine. Jan.-Feb., 1949. 12:1:23-25.

The shortage of trained speech therapists and the number of people in need of speech therapy are growing. Only research and a program for recruiting and training skilled personnel will solve the problem.

SPEECH CORRECTION--PERSONNEL

181. Houchin, Thomas D.

Notes on organizing a speech correction program in the public schools. J. of Speech and Hearing Disorders. Mar., 1949. 14:1:53-62.

Suggestions for the speech correctionist on establishing a program of speech correction. Gives materials the speech correctionist should have before beginning a program, procedure upon arrival, and samples of letters and tests, record forms, etc.

SPEECH CORRECTION--PROGRAMS--OHIO

182. Irwin, Ruth Beckey.

Speech and hearing therapy in the public schools of Ohio. J. of Speech and Hearing Disorders. Mar., 1949. 14:1:63-68.

"The purpose of this discussion is to outline the practice and procedures for the organization and execution of speech and hearing therapy programs in communities where qualified therapists are available."

SPORTS

183. Chapman, M. J.

Sports adapted for patients in Veterans Administration hospitals. J. of the Amer. Assn. for Health, Physical Education and Recreation. Feb., 1949. 20:2:116, 118.

Description of modifications and devices which make it possible for disabled veterans to take part in sports. Adjustments in equipment bring most of the popular sports within the activity and capacity of these handicapped invalids and convalescents.

STUTTERING

184. Van Riper, Charles.

Stuttering, prepared for the American Speech and Hearing Association, by Charles Van Riper, under the editorship of Wendell Johnson. Chicago, National Society for Crippled Children and Adults, Inc., 1948. 60 p., illus. 35¢

Bibliography: pp. 57-58.

"This is a book for parents, first of all and above all. It is also intended for physicians, nurses, social workers, teachers, psychologists, and all others who are necessarily concerned with the problems of those who stutter. The chief purpose of this book is public education and enlightenment. The pages that follow contain the bare minimum of information that should be clearly grasped by anyone concerned with a stuttering child or adult."

STUTTERING--PARENT EDUCATION

185. Johnson, Wendell.

An open letter to the mother of a stuttering child. J. of Speech and Hearing Disorders. Mar., 1949. 14:1:3-8. Reprint.

Reprinted from You and Your Child. Apr., 1941.

Dr. Johnson describes the circumstances and attitudes usually surrounding the development of stuttering in a child, which parents and teachers inadvertently bring about by their good intentions. Constructive suggestions on what to do and how to react to the situation are outlined simply and intelligently for the benefit of the parent.

TUBERCULOSIS--MEDICAL TREATMENT

186. Pfuetze, Karl H.

Streptomycin in the treatment of tuberculosis, by Karl H. Pfuetze and Marjorie M. Pyle. J. Am. Med. Assn. Mar. 5, 1949. 139:10:634-639.

A discussion of the efficacy of streptomycin in the treatment of extrapulmonary and pulmonary tuberculosis.

VETERANS (DISABLED)--SPECIAL EDUCATION

187. Van Schoick, Joseph H.

Their hospital time can be learning time. J. of Rehabilitation. Feb., 1949. 15:1:11-15.

A summary of the VA educational therapy program started in 1946 as a part of medical therapy. The educational opportunities and facilities available under this program are described. Case histories of rehabilitation are given.

VOCATIONAL REHABILITATION--OREGON

188. Oregon. Division of Vocational Rehabilitation, Salen.

Vocational rehabilitation for civilians; a partnership that pays. (Salem, The Division, 1949). 12 p.

An illustrated pamphlet on Oregon's program of vocational rehabilitation for disabled persons. Special services, cost, location of offices are given.

VOCATIONAL REHABILITATION--PUBLICITY

189. Publicity: Planning and practice; a group of three articles setting forth the what, why and the how of an effective program of public information. J. of Rehabilitation. Feb., 1949. 15:1:3-10.

Contents: In aid of legislation, by Michael J. Shortley. p. 3-4. The role of the specialist, by P. D. Fahnestock. p. 5-7. Using the tools of the trade, by Everett R. Spencer. p. 8-10.

VOLUNTARY HEALTH AGENCIES

See 184.

WALKING

190. Brown, Thelma.

Crutch walking device in a case of bilateral amputation with single prosthesis, by Thelma Brown and Clyde W. Phillips. Physical Therapy Rev. Feb., 1949. 29:2: 69-70.

A case history of a 50 year old diabetic with bilateral amputation is cited to illustrate methods employed for early ambulation after operation. Physical therapy and type of crutches used are described.

NEW BOOKS IN THE LOAN LIBRARY

NURSERY SCHOOLS

191. Landreth, Catherine.

Education of the young child, by Catherine Landreth with the collaboration of Katherine H. Read. New York, John Wiley & Sons (cl942). 279 p., illus. \$2.75.

"Recommended reading" at end of each chapter.

Bibliography: pp. 242-251.

"Booklist for children", pp. 272-274.

A comprehensive text on the nursery school in the United States, its origin, organization and function, together with educational practices and procedures suitable in institutions for the young child. Intended for the prospective teacher, the book has value for the parent and school administrator as well. The author is Director of the Nursery School, Institute of Child Welfare, University of California.

SCHOOL BUILDINGS

192. American Association of School Administrators.

American school buildings. Washington, D. C., The Assn., cl949. 525 p., front., illus., diagrs. (27th Yearbook). \$4.00.

Bibliography: pp. 325-341.

List of Members of the American Association of School Administrators: pp. 358-514.

This yearbook "discusses the importance of shared responsibility and scientific methods in broad scale community planning for the school plant, reviews the current experience and judgment in planning for the educational features of a building, summarizes current information on various technical aspects of construction and equipment, outlines some of the major financial considerations, calls attention to some unanswered questions in school plant research and concludes with a listing of planning steps."

Special facilities for handicapped children, pp. 108-110.

SPEECH CORRECTION

193. Minnesota. Minneapolis Public Schools.

Speech correction in practice. Minneapolis, Minneapolis Public Schools, 1948. (116) p.

Partial contents: Articulatory defects, voice disorders, stuttering, bulletin for parents and teachers.

A revision of a handbook written primarily for speech clinicians, but of value to parents and pupils as well as the teacher. Theories and methods of therapy are outlined with constructive suggestions. Excellent bibliographies review the latest developments in speech correction and related fields.

BULLETIN ON CURRENT LITERATURE

The publications listed in this issue have been received by the library of the National Society for Crippled Children and Adults and are available for loan. The library does not stock copies for sale. Prices are listed, when known, so that orders may be addressed directly to the publishers. The publications are listed by author and title under the subject heading by which the item is cataloged and filed in the library. The subject headings in the Bulletin can be identified by being in all-capital letters.

Because the library may have only a limited number of copies of any item listed, and because of the great number of requests frequently received, it is suggested that the resources of local libraries be investigated first. The services of the library are extended to organizations and individuals whose local resources are so limited as to make information otherwise unavailable. It is understood that the borrower agrees to pay shipping charges for sending him the loan material and for returning it to the library.

THE NATIONAL SOCIETY FOR CRIPPLED CHILDREN AND ADULTS

Officers and Executive Committee

1949

Dr. John J. Lee, <i>Michigan</i>	President
William H. Jaenicke, <i>California</i>	President-Elect
E. W. Palmer, <i>Tennessee</i>	Past President
Ritchie Lawrie, Jr., <i>Pennsylvania</i>	Vice President
J. Archer O'Reilly, Jr., <i>Missouri</i>	Vice President
George H. Williamson, <i>Illinois</i>	Vice President
Gerard M. Ungaro, <i>Illinois</i>	Treasurer
Lawrence J. Linck, <i>Illinois</i>	Secretary
Miss Louise Baker <i>Arizona</i>	Raymond J. Knoepfel <i>New York</i>
Mrs. Jack Carnes <i>Arkansas</i>	Dr. George A. Selke <i>Montana</i>
Paul Dietrich <i>California</i>	Roscoe L. Thomas <i>Texas</i>
Davis Geiger <i>Kentucky</i>	Parker Trowbridge <i>Massachusetts</i>

A nationwide organization with headquarters in Chicago and more than 2,000 member state and local societies for the crippled and handicapped throughout the country.

The Society's many projects and services are directed and supervised by professionally trained specialists. Services include health, welfare, education, rehabilitation, recreation, recruitment and training of specialized personnel, and employment for all types of handicapped persons.

All services are established and carried out in a manner to supplement and extend and not to duplicate or compete with the services of any other agency, public or private. The National Society is supported by the annual sale of Easter Seals.

BRITANNIA TERRA NO VITELLUS

and the animals and the birds and even man himself are not yet quite rid of it. The first signs of the disease are very slight, and the animal may go on for months before it becomes apparent. When it does appear, it is usually in the form of a fever, and the animal may die within a few days. The disease is most common in the winter months, and it is believed to be caused by a virus.
